MAZIN ISLAM

Profile

As a full-stack developer with some experience, I am proficient in working with Node.js, React, and Next.js. I am comfortable working with both the front-end and back-end of web development and can handle tasks such as designing and implementing user interfaces, creating and maintaining databases, and integrating third-party APIs. While I am still developing my skills, I am eager to learn and grow in my role and am excited to take on new challenges.
